POWERED BY **REHAB ESSENTIALS** AND IN ASSOCIATION WITH **IPTA**  
PRESENTS

---

## DOCTORATE OF PHYSICAL THERAPY PROGRAM

### PROSPECTUS

**APTA Approved**  
**CAPTE Accredited**

### OVERVIEW OF DOCTORATE OF PHYSICAL THERAPY PROGRAM

**Ingenious Physical Therapy Associates** in collaboration with **University of Montana** and **Rehab Essentials, USA** is making **Doctorate of Physical Therapy Program** accessible for Indian Physiotherapists at an affordable price.

University of Montana was founded in 1893 and is a reputable public university. Doctorate of Physical Therapy is the clinical degree offered in USA for Physical Therapists.

IPTA is the approved key partner to the university and is the official entity responsible for screening and admitting qualifying Indian students to the DPT program. Students upon admission will get a unique ID and Password from the University to access course requirements and complete the curriculum.

IPTA will also provide additional onsite mentoring from local satellite centers in India apart from direct support from University of Montana professors and other university resources. Along with the DPT Program support, IPTA will also make a Bridge Program available to the students to fulfill the deficient credits in order to be eligible to take the Licensing Exam for aspiring students who plan to work in USA.

IPTA is equipped to guide the students through the complete process of credential evaluation, credit deficiency fulfillment, NPTE Exam preparation, VISA guidance and also will provide jobs in USA post completion of the licensing Exam. IPTA will not only assist in finding a perfect job in USA but also will train and offer support to be successful in the job. IPTA will also have opportunities for the DPT graduates to work as mentors for the program.

## **DPT PROGRAM COURSE DELIVERY FORMAT**

Course delivery is online and onsite format. Each student will login to their assigned courses in a particular sequence, complete their assignments, participate in case discussions, review videos, lectures, presentations pertaining to their course objectives, take part in discussions, quizzes and complete required tests.

Students will also have to take tests and complete projects periodically as per course objectives and instructor requirements.

Students are required to complete a Capstone Project as a requirement of the curriculum to obtain a DPT degree. For this project each student will have an assigned mentor from the University of Montana. Students will be interacting in a unified classroom, giving them the

opportunity to interact with other students across the globe. All students from different countries including USA will be in same class.

## Onsite Mentorship Program

Each Student will be assigned a mentor for the DPT Program and will have an opportunity to attend optional **Onsite Mentorship Program** held at the **Satellite Center** twice a semester, where a highly qualified and US trained clinical instructor will be mentoring the students.

## Practical Training Program

Students will also be offered to attend optional **Practical Training Program** held at the **Satellite Center** where a highly qualified and US trained professional will provide practical hands on training to the students. This Program will be offered for one week every year at the satellite center.

Students are recommended to work fulltime while enrolled in this program to enhance their clinical experience. Post completion of the DPT degree and NPTE Exam, eligible candidates will be offered jobs in USA.

**\*Mentorship program and Practical training program are not mandatory for DPT completion. They are an optional program, available if a student chooses to receive hands on training.**
